Outcomes of the Course

India's border management is an integral part of India's defence and commerce. The state secures sovereignty through maintaining and regulating borders with neighbouring countries. Border management is the responsibility of both states or countries sharing the boundary. Only then can conflict between nations be reduced easily without affecting international peace and decorum. Border management in the India aims to ensure that migrants can cross borders in emergencies while maintaining control. The primary role of borders has traditionally been to prevent threats such as cross-border terrorism, illegal migration, and drug trafficking.

- Proper border establishment will ensure that the countries never go to war.
- If there are no proper boundaries, countries will start claiming each other's land.
- Political conflict can be kept at bay only due to border management.
